

I purchased this general transcription training course recently to help me get started in a new career and I couldn't be happier with my decision. This is an *extremely* comprehensive course and I can't believe how inexpensive it is to purchase. There's NOTHING out there like this (believe me, I looked) and it has ALL you need to get started! I highly recommend this course!

Laura P., Seattle WA

If you are looking to get into transcription this is a great course to buy. It's inexpensive and gives you a true look at the business and what you are getting into! I bought and completed this in Jan 2010. Now it's May 2010 and I have been hired by several companies and have as much work as I could ever want. In my opinion this is worth every penny.

Fleurdamae, Chicago, IL

I have purchased a General Transcription Training course called The Zoom Transcription Method through Janet Shaugnessy, finding this to be one of the best programs I could have ever put my money towards. I have checked out and paid for several other work at home programs that never worked for me other than taking my money. I have recently purchased the Zoom Transcription Method course and find it to be exactly what I have been looking for in advancing myself a career. If you are looking for a work at home program that has a easy walk through description and helps providing all information in beginning your own business this is for you. Working from home has been one of my passions and could be yours also. If you are a college student or stay at home mom or just tired of the rat race of going out working in the work force this program can work for you. I am very pleased with this product and hope that you will not waste time investing in programs that doesn't work, like I have in the past. Seriously, this program is for anyone that wants to make serious cash rather it is part time or full time. This program by Janet Shaugnessy is well worth the money. Thank you Janet for leading me into the right direction for my career and success.

Terry S., Pace FL

I had to purchase the transcription training on DVD, I loved the mini course, it maps out everything that you need to know as a general transcriptionist.

Shonta M.,

I am excited to get going on the course. You're an awfully nice lady, so caring...I plan to post a very positive review of the course for a consumer website that I write for. I'll email you with a link to it when I do. :-)

Deb K.

I got the disk today and skimmed over it. HOLY COW! This program is every bit as comprehensive as most programs out there costing in the \$2,000 range! Your GT course is well worth \$1200. Had I spent that much on it, I'd not have felt ripped off.
